Forecast For The United Kingdom
Issued by Met Office Exeter
at 1600 on Wednesday 01 Sep 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Dry for most, but often cloudy.

This Evening and Tonight:
Mostly cloudy with some light showers in parts of the east overnight, whilst clear spells are possible in the north and west with a few mist or fog patches developing.

Thursday:
Again, a rather cloudy start for many, but cloud breaking more readily than recent days away from cloudier North Sea coasts to give warm sunny spells. Breezy in the south.

Outlook for Friday to Sunday:
Continuing largely dry on Friday and Saturday before likely turning less settled from the west on Sunday with showers, and perhaps longer spells of rain. Becoming breezier but also warmer.
